CARTS

UTILITY CARTS

Specifications

Construction

Shelves

Constructed of #10 (.135) gauge deck wires spaced on nominal $\frac{3}{4}$ " centers with #6 (.192) gauge support wires running perpendicular to the deck wires. Support trusses welded on all sides of wire frame with #3 (.250) gauge wires top and bottom and #6 (.192) gauge truss wire welded between the top and the bottom wires.

A round tapered 1.6" high steel collar is welded at each corner. Additionally, a suitable number of support trusses is welded to the underside of the 18" and 24" wide shelves. All contact points are welded.

Shelf position:

MUC and M34836 carts:

- Lowest position is 8" from floor
- Highest position is 29" from floor

Strength Rating

Load rated to support 800 lbs. per unit of distributed weight for MUC carts; Load rated to support 250 lbs. per unit for M34836 carts.

Finishes:

Green Epoxy: Three-step process to plating quality wire and steel

1. Zinc Plating; 2. Rust inhibiting chromate seal;
3. Electrostatically applied baked-on antimicrobial polymer coating (NSF approved for food and splash zone)

Plating Plus™:

1. Zinc Plating; 2. Chromate seal; 3. Clear lacquer. (NSF approved for all environments)
